SLOVENIA'S CHALLENGES 2020: A vision for the development and regulation of blockchain technology in modern society

Ljubljana 11.10.2017

Dr. Miro Cerar, Prime Minister of the Republic of Slovenia

Quote:

*"Successful Slovenian companies in the field of the use of blockchain technology are already ranked among the world's leading developers of digital investment platforms, and therefore we want to position **Slovenia as the most recognised blockchain destination in the European Union**, which will have established all of the infrastructure necessary for its implementation and development."*

Dr. Miro Cerar, Prime Minister of the Republic of Slovenia

Quote:

*"We stand at the threshold of major changes. I shall always advocate for progress and modern technology. But alongside all of the new concepts in everyday life, we cannot forget about the **most important one – people**. We will have to work to ensure that the new technology is an asset to and improves our quality of life. Only then will we be able to say that we have made progress."*
